DETAILED ACTION

Election/Restrictions

- I. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12 and 16-21, drawn to optical coating for a substrate having antireflection layer of dielectric and metallic layer, classified in *class 359, subclass 585*.
 - II. Claims 13-15, drawn to optical coating for a substrate having alternatively arranged high refractive index layer and low refractive index layer, classified in *class 359, subclass 586*.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, the optical coating recited in group I, is directed to optical coating *having metallic layer and anti-reflection layer*, which implicitly suggests the optical coating has *anti-reflection property and conductive property* (due to metallic layer), while the optical coating recited in group II recited is an *interference coating* which can have transmission, reflection or antireflection property. The two invention groups, as claimed in the claims, cannot be used together.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2872

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. This application contains claims directed to the following *patentably distinct species* of the claimed invention:

In invention group I,

(A) an optical coating having a first anti-reflection layer of dielectric/metallic layer/a second anti-reflection layer of dielectric, (claims 1-6, and 16-21),

(B) an optical coating having a first anti-reflection layer of dielectric/metallic layer/a second anti-reflection layer of dielectric/a second metallic layer/a third anti-reflection layer of dielectric, (claims 7-12).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious

variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. A telephone call was not made to applicant's attorney due to the complexity of the restriction requirement to request an oral election.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Audrey Y. Chang whose telephone number is 703-305-6208. The examiner can normally be reached on Monday-Friday (8:00-4:30), alternative Mondays off.
